DR600 DMR Repeater

KEY FEATURES AND BENEFITS

• Professional 1U Design

Professional 1U design saves installation space.

• Outstanding Heat Dissipation

The unique cooling design combines a built-in heat pipe and four fans to ensure efficient heat dissipation, preventing the repeater from over-heating in high output power mode.

• Smart Digital-Analog Auto Detection

DR600 can be configured to analogue, digital or mixed mode. When configured to mixed mode, the repeater dynamically switch between analogue and digital depending on the type of received calls.

• Accessory Expansion

DR600 supports third party development via a rear port of the repeater. This is achieved via the pin control through the repeater rear port.

• IP Site Link Connection (Optional)

DR600 repeaters can be connected based on TCP/IP network (LAN or VPN in WAN) to form a IP connection network, which expand the repeaters' coverage area.

• LED Indicator

DR600 has 9 LEDs to indicate repeater's different status clearly, such as power-on, analogue repeating, digital repeating, transmitting, receiving, alarm, etc.

• AIS/SIP Interface

It provides AIS/SIP second development interface, allowing dispatch, telephone system and other facilities to be developed by the third party.

• Remote Monitor and Diagnosis

It supports remote monitor/diagnosis and controlling repeater status.
